Sir:

Further to Applicants' Duty of Disclosure pursuant to 37 C.F.R. §1.56,
Applicants wish to bring to the Examiner's attention the material cited on the enclosed
PTO-1449 form. Copies of the cited documents are enclosed.

Pursuant to 37 C.F.R. §1.98(a)(2)(ii), copies of the cited U.S. publications and/or
patent documents have not been included.

The references cited in this Information Disclosure Statement were either listed
in an International Search Report in the corresponding International Application or
cited in the German Office Action from the original priority application, copies
enclosed.

Applicant: Sahari et al.
Application No.: Not Yet Known

Of the non-English language references cited in the International Search Report, EP 0660 106, the Abstract and Figures, was cited as Category A. US 4,643,580 has been cited as equivalent to DE 33 44 387.

DE-OS 2 255 471 was cited in the Examination Report dated 26 January 2005 from the German Patent Office in the parent German application 10 2004 023 178.8.

The action states the pertinence of the references as:

From publication 1) [DE-OS 2 255 471], in particular Figure 1, and the associated text, an arrangement for photometric analysis is known, for a fluid test, such as a drop, where the arrangement has a receiving point area on a top surface for holding the medium and in a vertical position of use, underneath the receiving point, a light inlet and a light outlet.

The horizontally oriented light outlet having an arrangement to guide the light upwardly for example to a detector, is known in the publication 2) [EP 0 660 106], in particular Figures 2 and 4 with the corresponding text.

Claim 1 is therefore not patentable as lacking an inventive step.

Applicants have submitted U.S. 3,734,622, which is the equivalent U.S. Patent to DE-OS 2 255 471.

Applicant: Sahari et al.
Application No.: Not Yet Known

It is respectfully requested that the Examiner consider these documents and return an initialed copy of the PTO-1449 form indicating his consideration of the cited materials.

Respectfully submitted,

Sahari et al.
